To me ▾

Hi, my name is Catherine

My son, Eric, started college this year but he still lives at home. We have decided to treat him to a laptop for Christmas. We've spent time researching the market and I've picked one out for him, which will set me back a few hundred euro.

Eric will need to take the laptop to college with him. I was wondering if I should buy gadget insurance for the laptop in case it gets stolen or breaks. What do you think?

Thanks,
Catherine
