

PRODUCT RECALLS

Citroen C4 Picasso recall

 JUNE 4, 2015

Citroen Ireland is voluntarily recalling certain C4 Picasso motor vehicles. On affected vehicles, the front suspension wishbone mounting bolts might not be to the correct specification. There could therefore be a risk of the bolts failing and leading to possible reduction of directional control of the vehicle. The affected production range is from July 2013 to November 2014. There are 656 affected vehicles in Ireland.

What to do

All affected customers will be notified directly by post by Citroen inviting them to contact their nearest Citroen dealer to arrange for the necessary work to be carried out free of charge. Details of your nearest Citroën dealer can be found at www.citroen.ie.
