## Citroën C3 Picasso safety recall

 JUNE 21, 2011

Citroën is carrying out a voluntary safety recall of 203 Citroën C3 Picasso vehicles in the Republic of Ireland.

In some cases, pressure applied from the front passenger's foot to the footwell can interfere with the braking mechanism located behind the glove box. If significant pressure is applied this could slow down the vehicle.

### What to do:

All affected customers will be notified directly by post by Citroën inviting them to contact their Citroën dealer as soon as possible to arrange for the necessary work to be carried out. A list of dealers in Ireland can be found at [www.citroen.ie](http://www.citroen.ie)

The work carried out as part of the recall will be completed free of charge.
