

# PRODUCT RECALLS

## Honda Recall Certain Civic Modals

 MARCH 14, 2018

Honda Ireland is taking recall action with regard to certain models of its 2017 Civic model series.

The trailer hitch (tow bar) vertical load value stated in the owner's manual (OM) for these models does not comply with the European certified value:

1.0L models	OM value: 80kg	Certified value: 75kg
1.5L models	OM value: 100kg	Certified value: 75kg

Honda Ireland states that testing has been carried out to confirm that there is no safety concern associated with using the vertical load value stated in the defective OM.

The models in question are

MODEL	TYPE	MODEL YEAR	VIN FROM	VIN TO
CIVIC	FK6	2017	SHHFK6**0HU000101	SHHFK6**0HU017473
	FK7		SHHFK7**0HU000101	SHHFK7**0HU013676
	FK8		SHHFK8**0HU000101	SHHFK8**0HU002774

## What to do

The owners of all affected vehicles will be contacted by mail and asked to take their vehicle to a Honda dealer or authorised repairer. The dealer will remove the old owner's manual from the vehicle and replace it with a new one that contains the revised trailer hitch vertical load values. This work will be carried out at no cost to the owner.

This recall affects 629 vehicles in the Republic of Ireland.
