

PRODUCT RECALLS

Isuzu Ireland Unlimited recalls Isuzu D-Max

 JUNE 5, 2019

Isuzu Ireland Unlimited is carrying out a voluntary recall of certain models of the D-Max. The vehicles concerned were produced between February 2018 and October 2018.

A production fault may cause the rear axle leaf springs to break. There is a risk that rear axle steering may fail.

There are 54 affected vehicles on the Irish market.

What to do:

Isuzu Ireland Unlimited will be writing directly to those owners affected by this voluntary recall to arrange to have their vehicles checked.

You can also contact Isuzu Ireland Unlimited directly by telephone on **01-4194500**.
