## Product Safety Information Notice on a Keenstone Battery Charger MH-8S sold on Amazon

📅 APRIL 19, 2023

A safety issue has been identified with a Keenstone Battery Charger MH-8S sold on Amazon.

The affected products present a risk of electric shock and fire as the insufficient wiring could cause overheating of the wires and fire under fault conditions. The product's fuse and plug did not meet the requirements of the relevant safety standard.

The brand is Keenstone. The unique Amazon Standard Identification Number (ASIN) is B071NZ6ZCC. The model number, barcode and batch numbers are unknown.

There were approximately 86 affected products in the Republic of Ireland. The affected products were sold on Amazon.

## What to Do

If you purchased one of these products, please discontinue use immediately. You may wish to contact Amazon to see if there are any remedies available to you. This can be done via your user account on Amazon.
