## Product Safety Information Notice on MyBambini's Bottle Warmer Pro™

📅 MAY 20, 2025

A safety issue has been identified with a MyBambini's Bottle Warmer Pro™.

The MyBambini's Bottle Warmer Pro™ is unable to reach temperatures of greater than 50°C, which contravenes HSE public health advice requiring water at a minimum of 70°C for preparing baby formula. This may result in the presence of harmful bacteria in the formula, posing a risk of infection. For more information, see the HSE guidance on [preparing baby formula](#).

The brand is MyBambini's. The model is MyBambini's Bottle Warmer Pro™. The product was sold via the [www.mybambinis.com](http://www.mybambinis.com) website.

### What to do:

Consumers should stop using the product to heat the water used to prepare the baby formula.

Consumers can continue to use the product to reheat pre-prepared formula and breastmilk.
