Product Safety Information Notice relating to Time 2 Core Electrical Cables

📅 AUGUST 16, 2021

TIME Cables would like to make customers aware of a safety concern with regards to TIME Cables products sold via B&Q and TradePoint from December 2020 to April 2021.

A printing error on the packaging has resulted in the incorrect amp rating of 25A being advised, as opposed to 6A, 10A or 16A.

A safety issue has been identified with the affected products where a printing error may result in the product(s) being used for an installation which draws in excess of the current for which it is officially rated, potentially causing a risk of fire. Please check with your installer that these products have not been used with such applications. There are 224 affected products in the Republic of Ireland.

PRODUCTS AFFECTED			
Description	Barcode	Sheath Text visible on the cable will include the below	Correct maximum amp rating
