Renault extends Captur recall

 JULY 14, 2015

Renault has extended the voluntary recall of its Captur model to cover vehicles produced up to March 2015.

This is an extension to the recall which was announced in April this year.

There is a potential of a low leakage from both front flexible brake hoses or in extreme cases a sudden bursting of the flexible hose. This could lead to risk of brake fluid loss and cause reduced braking efficiency.

This recall affects a further 394 vehicles in Ireland.

What to do

Letters will be sent by Renault Ireland to owners of affected vehicles and customers will be asked to arrange an appointment to have the car repaired at an authorised service agent. This repair will be free of charge. Customers can also call Renault's Low-call number 1890 771 771 for more details.
