Toyota recalls Prius

 OCTOBER 12, 2016

Toyota Ireland is carrying out a voluntary recall of certain models of the Prius manufactured between December 2015 and August 2016.

The subject vehicles are equipped with a foot-operated parking brake system containing a parking brake cable and a crank lever. Over time, during normal operation of the vehicle, the cable could disengage, causing the parking brake to become inoperative.

This affects 341 vehicles in Ireland.

What to do:

Toyota Ireland will be writing directly to those customers involved in this recall to arrange to have the repair carried out. The letter will advise you to contact your nearest Toyota Dealer/Authorised Repairer who will arrange to do the check/repair free of charge. Toyota Ireland can be contacted on: 01 4190222.
