Toyota recalls Proace

 JULY 13, 2017

Toyota Ireland is carrying out a voluntary recall of certain models of the Proace manufactured between June 2016 to September 2016.

The risk associated with this vehicle is there is a possibility that the relay linked to the electrical circuit of the starter is out of specification. As such, the relay might be blocked in close position. If this occurs, there is a risk of the starter overheating. Also, should a vehicle have one gear engaged, the vehicle could also start to move on its own.

There are 41 affected vehicles on the Irish market.

What to do:

Toyota Ireland will be writing directly to those customers involved in this recall to arrange to have the starter relay replaced. The letter will also advise consumers affected by this voluntary recall to contact their nearest Toyota Dealer/Authorised Repairer who will arrange to do the repair free of charge. Toyota Ireland can be contacted on: 01 419 0222.
